Skills

HTML, XML, UI/UX design, CSS, PHP, SQL, Turbo Prolog, C/C++, Javascript

NodeJS, Angular, ReactJS, Ruby on Rails, ExpressJS

Oracle, MySQL, Firebase, Neo4J, Microsoft Access, MongoDBAtlas, IBM DB2 Cloud, Microsoft Azure

Python, Scala, Tensorflow, TensorflowJS, Keras, Sklearn, Opencv, Streamlit, Flask, Matlab, Azure, Watson Studio, Weka

Very Good

Apple Swift Code, Google Cloud and AI Platform, AWS, Google Sandbox

Graphical Design, Adobe After Effects, Canva

Linux SuSe, Linux Backtrack, RedHat.

Senior-level IT Executive with 12 years of complex program management and product development experience in government to support IT operations. Background in successful IT implementation and presentation to key stakeholders. Successfully coordinates project work to mitigate risks and solve technical issues while providing IT budget oversight. Forward-thinking Company Founder with solid history in business development. Strong leadership, logistical and social skills resulted in extensive professional network. Positive outlook and excellent problem-solving skills led to increased morale and improved working conditions for employees.

Work History

2009-12 -
Current

Information Technology Officer

The House of Representatives of The Republic of Indonesia, Jakarta

- Performed detailed recapitulation of IT assets by up to 99%.
- Improved The House's workload capacity to 70% as proposal.
- Developed and led large-scale technology initiatives for long-term strategic plans and solutions.
- Configured and implemented IT initiatives to produce measurable business value.
- Presented comprehensive entire system IT infrastructure in bottom-up manner for General Secretary of The House.
- Presented best infrastructure recommendation solution to be adapted in The House.
- Create better 3D visualization for The House's website.
- Establish effective system recommendation as System analyst.
- Establish stronger IT support for Indonesia Parliament Business or sector Government.
- Performed user account maintenance tasks, archiving defunct credentials and monitoring login systems for suspicious trends.
- Created customized development frameworks for customers based on specific business goals and budgetary constraints.
- Utilized different methods to troubleshoot software and hardware issues.
- Identified areas that could be improved through specific processes and addition of new software.
- Escalated project-related issues quickly to help rectify problems and avoid delays.

Organisational / managerial skills, Leadership, Teamwork, Strategic Planning

Very Good

Hadoop, Spark (Spark GraphX, Spark MLlib, Spark Streaming)

Very Good

- Created all troubleshooting documentation and distributed it to team members and key stakeholders.
- Completed software development lifecycle from requirement analysis to test planning, test case development and test execution.
- Balanced multiple projects by completing and updating documentation, managing scope and adjusting schedules.
- Worked closely with business users and business analysts to understand functionality and propose creative solutions to meet business needs.
- Participated in risk assessment analysis for all software produced by The House IT Programmer, applying standard change control procedures to minimize inherent liability in software releases.
- Developed and implemented workflow templates, prioritizing efficiency and ease-of-use for end-users of Portal of The House.
- Designed, developed and integrated software solutions based on business requirements and objectives.
- Oversaw document development across project workstreams to create internal control statements per compliance and regulatory standards.
- Enhanced project management skills by defining and presenting system solutions and timelines for business needs or technical problems.
- Troubleshoot incidents reported by end-users to schedule system changes and identify permanent solutions.
- Developed diagrams to describe and lay out logical operational steps.
- Communicated and explained business requirements to team members to understand and implement functional demands.
- Analyzed existing systems and databases and recommended enhancements to solve business needs
- Collaborated with upper management to drive strategy and implement new processes.
- Performed internal system acceptance to deliver well-tested enhancements and meet business requirements.
- Assessed business requirements to forecast annual budgetary operational costs.
- Determined best methods for IT to support key business objectives.
- Established positive relationships with industry leaders to gain insight into innovations and trends.

- Groomed team talents through robust professional development program and training opportunities.
- Resolved workflow issues to optimize team productivity and improve delivery times.
- Designed internal dashboard for at-a-glance system and project status reporting.
- Aligned IT solutions and deliverables with government strategic vision.
- Created long-range IT plan to support projected growth and requirements for added capacity.
- Evaluated IT capital budget to measure and monitor fixed asset proposals.
- Built IT infrastructure to support key business strategies and evolving processes.
- Configured and implemented IT initiatives to produce measurable business value

2019-08 -
Current

Graduate Research Assistant

United Arab Emirates University, UAEU, Al ain

- Improve machine learning accuracy to 98% by using modified random forest for estimating Quality of Experience inference.
- Found Deep Self Organizing Map to estimate MOS of video Quality of Experience by accuracy up to 80%.
- Outperformed ITU-T P.1203 standard by up to 37% accuracy.
- Escalate machine learning model by 79.6% with better features.
- Gathered, arranged and corrected research data to create representative graphs and charts highlighting results for presentations.
- Planned, modified and executed research techniques, procedures and tests.
- Prepared materials for reports, presentations and submission to peer-reviewed journal publications.
- Maintained and calibrated various types of lab equipment.
- Generated data models and performed analysis to produce reports outlining results.
- Collected research data through experimentation, surveys and leading focus groups.
- Worked both independently and collaboratively in fast-paced laboratory environment.
- Performed statistical, qualitative and quantitative analysis.
- Conducted tests on equipment and instruments for quality.
- Worked with principal investigators to coordinate qualitative research.

- Recorded experimental findings in laboratory notebook to analyze and interpret experimental findings.
- Collaborated with team members to achieve target results.
- Completed paperwork, recognizing discrepancies and promptly addressing for resolution.
- Carried out day-to-day duties accurately and efficiently.
- Resolved problems, improved operations and provided exceptional service.
- Identified issues, analyzed information and provided solutions to problems.
- Completed administrative and research duties per professor request.
- Researched information regarding video Quality of Experience optimization, machine learning, big data to assist professors with academic pursuits.

2022-01 -
Current

Company Owner

Xavyr Ltd., London

- Increased sales by 60%.
- Aligned branding initiatives and sales strategies with client goals.
- Supported company goals through careful reinvestment of profits.
- Spearheaded revenue growth through sales, new and enhanced product development and new market penetration.
- Motivated employees to consistently improve performance through company-wide incentive plans.
- Updated and resolved incidents and managed accessorial charges objectively while maximizing profit.
- Recruited, hired and trained initial personnel, working to establish key internal functions and outline scope of positions for new organization.
- Developed and optimized organizational systems to boost efficiency and keep operations scalable and agile for changing demands.
- Trained and guided team members to maintain high productivity and performance metrics.
- Negotiated price and service with customers and vendors to decrease expenses and increase profit.

2013-02 -
2015-08

Image Processing Researcher

Medical Image Technology Laboratory, MITL, Inje University, Gimhae

- Improve machine learning accuracy to segment brain hippocampus image automatically by up to 80%.
- Completed administrative and research duties per professor request.
- Researched information regarding medical image processing to assist professors with academic pursuits.
- Presented results to field experts at Korea Multimedia Society, Korea National Journal and International Journal.
- Performed statistical, qualitative and quantitative analysis.
- Wrote and edited data collection forms and questionnaires.
- Prepared literature for reports, presentations or submission to peer-review journals.
- Contributed to professionally-written scientific paper for publication.
- Analyzed acquired information and presented to professors.
- Gathered, reviewed and summarized literature from scientific journals such as Google Scholar and IEEE and produced graphs and other scientific calculations.
- Planned, modified and executed research techniques, procedures and tests.
- Contributed to research and data analysis within medical image processing landscape.
- Recorded data and maintained source documentation following good documentation practices.

2021-05 -
Current

Graphic Designer

United Arab Emirates University, UAEU, Al ain

- Improve media efficacy and efficiency up to 80%.
- Completed in-depth product design tests using updated software tools.
- Designed multimedia layouts, templates and unique branded looks.
- Worked with clients to gather and define requirements, establish scopes and manage project milestones.
- Completed final touches for projects before rollout.
- Designed creative digital displays used in online advertising for UAEU communities.

- Developed creative design for print materials, banners, videos, posters, logos and signs.
- Met with customers to present mockups and collect information for adjustments.
- Created digital image files for use in digital and traditional printing methods.
- Applied knowledge of production to create high-quality images.
- Built corporate brands by designing cohesive looks between elements.
- Managed design conceptualization, milestones and customer feedback.

2009-02 -
2009-08

Faculty Member

Telkom University, Bandung

- Incorporated proven methods of engagement and assessment that facilitated student mastery of content up to 50%.
- Selected and developed instructional material and planned instruction to enhance student learning.
- Used variety of learning modalities and support materials to facilitate learning process and accentuate presentations.
- Encouraged class discussions by building discussions into lessons, actively soliciting input, asking open-ended questions and using techniques to track student participation.
- Shifted between informal and formal methods of teaching to create multi-layered web of learning incorporating experiments, practical activities, discussions and projects into lessons.
- Served on college, program and department committees and assisted department head in exercising duties.
- Evaluated student learning by creating and applying course competencies and accurately evaluating student progress.
- Created assignments to encourage student learning and develop communication skills and higher-order thinking.
- Provided students constructive, encouraging and corrective feedback.
- Demonstrated interpersonal and communication skills resulting in clear communication of subject matter to students.
- Modified instructional methods and strategies to meet diverse student needs.

2009-02 -
2009-08

Research Assistant

Artificial Intelligence Laboratory of Telkom University, Bandung

- Improved machine learning accuracy up to 80% for gait recognition.
- Gathered, arranged and corrected research data to create representative graphs and charts highlighting results for presentations.
- Planned, modified and executed research techniques, procedures and tests.
- Prepared materials for reports, presentations and submission to peer-reviewed journal publications.
- Maintained and calibrated various types of lab equipment.
- Generated data models and performed analysis to produce reports outlining results.
- Collected research data through experimentation, surveys and leading focus groups.
- Worked both independently and collaboratively in fast-paced laboratory environment.
- Performed statistical, qualitative and quantitative analysis.
- Conducted tests on equipment and instruments for quality.
- Recorded experimental findings in laboratory notebook to analyze and interpret experimental findings.
- Resolved problems, improved operations and provided exceptional service.

2008-02 -
2009-02

Faculty Research Assistant

Telkom University, Bandung

- Performed laboratory procedures in support of graduate students and undergraduate fellows' projects.
- Identified negative trends such as groups of students missing key concepts and worked with professors to resolve concerns.
- Led courses independently with minimal oversight from professors.
- Relieved scheduling burden from professors and expanded teaching abilities by leading undergraduate classes.
- Checked assignments, proctored tests and provided grades according to university standards.
- Oversaw classes of up to 70 students in Artificial Intelligence.

- Supported advanced field research by assisting with experimental design, execution and results tracking.
- Applied fair grading practices consistently to evaluate students' work and assign letter or number values.
- Exceeded goals through effective task prioritization and great work ethic.

2005-09 -
2007-09

Research Assistant

Global System of Mobile Communication Laboratory of Telkom University, Bandung

- Gathered, arranged and corrected research data to create representative graphs and charts highlighting results for presentations.
- Planned, modified and executed research techniques, procedures and tests.
- Prepared materials for reports, presentations and submission to peer-reviewed journal publications.
- Generated data models and performed analysis to produce reports outlining results.
- Collected research data through experimentation, surveys and leading focus groups.
- Worked both independently and collaboratively in fast-paced laboratory environment.
- Performed statistical, qualitative and quantitative analysis.

Education

2019-08 -
Current

Ph.D.: Computer Science

United Arab Emirates University (UAEU) - Al Ain, UAE

- Awarded Graduate Research Assistant Fellowship.

2013-03 -
2015-08

Master of Engineering: Image Processing

Inje University - Gimhae, South Korea

- Awarded Research Grant to pursue Medical Image Processing Research for Master.

2004-08 -
2009-03

Bachelor of Applied Science in Information Technology: Informatics

Telkom University - Bandung, Indonesia

- Received BBM PPA Scholarship for pursuing Bachelor Degree.

2013-03 -
2015-03

Bachelor of Arts: Islamic Studies

Islamic Online University (IOU) - Qatar

- Continuing education in Islamic Studies.

Accomplishments

- Improve up to 37.1% machine learning model accuracy from ITU-T P 1203 standard to estimate video Quality of Experience and achieved recall up to 0.963.
- Performed detailed recapitulation of IT assets by up to 99%.
- Improved The House's workload capacity to 70% as proposal.
- First Winner for Best Infographics in 2019 of The House of Representatives of The Republic of Indonesia.

Additional Information

- Bachelor Scholarship Grant Award BBM PPA in 2008.
- Master Scholarship Grant Award in 2013.
- PhD Fellowship Award from UAE University in 2019.
